

Asking scientific questions

Asking questions that can be answered using a scientific enquiry.

Making predictions

Using prior knowledge to suggest what will happen in an enquiry.

Planning an enquiry

Deciding on the method and equipment to use to carry out an enquiry.

Observing closely and taking measurements

Using senses and measuring equipment to make observations about the enquiry.

Recording and presenting results

Using tables, drawings and other means to note observations and measurements.

Interpreting and communicating results Using information from the data to say what you found out.

Evaluating

Reflecting on the success of the enquiry approach and identifying further questions for enquiry.
